

Geosynthetics Solutions Provider

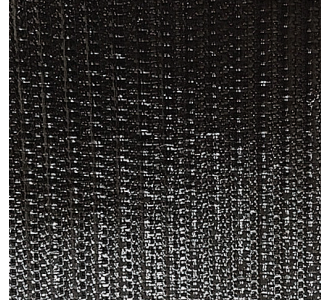

Non-Woven

- Civil fabrics
- Environmental fabrics

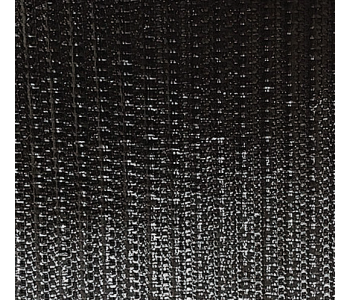

Slit Tape Woven

- Stabilization fabrics
- Light duty stabilization

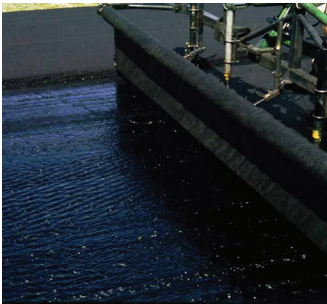

Medium Strength Wovens

- Drainage monofilament fabrics
- High strength for stabilization

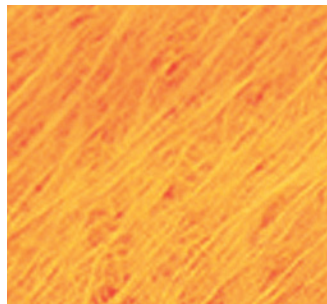

High Strength Wovens

- High strength fabrics
- High flow rate fabrics

Paving Fabric

- Non-woven
- Peel and stick

Orange Fabric

- Delineation fabric
- Soil separation and drainage

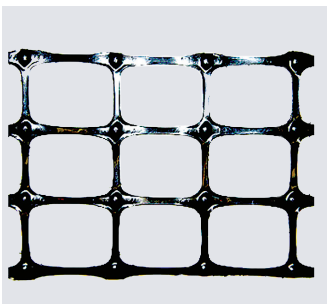

Spun Bond Fabrics

- Heat-bonded fabrics
- Ranges from 50.8 - 339.06 g/m²

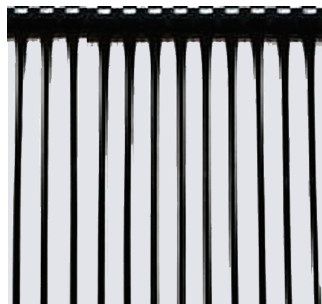

Septic Fabric

- 16.9 g/m² & 23.7 g/m²
- Separation for drainfields

Bi-Axial Grids

- Subgrade stabilization
- Aggregate base reinforced

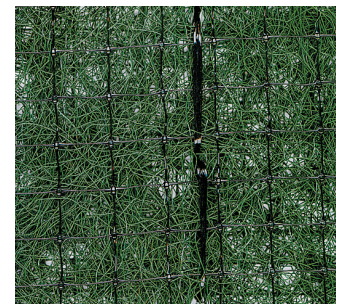

Uni-Axial Grids

- Reinforced soil slopes
- Mechanically stabilized earth walls

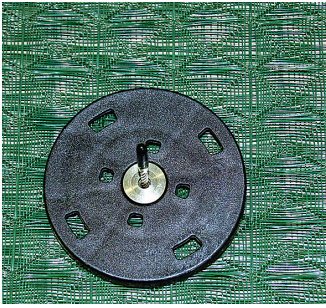

Erosion Control

- Straw and coconut mats
- All-natural netting

Turf Reinforcement

- Synthetic stitch bonded mats
- Long-term erosion protection

TRM

- 3 - 25 year design life
- Anchoring systems

Jute Mat

- 100% biodegradable
- Water, wind and erosion protection

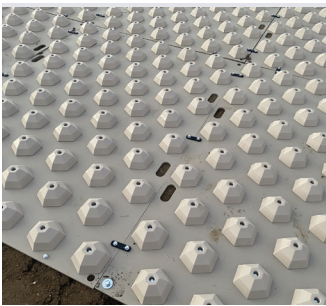

Wattle

- 225, 300 and 500 mm (9", 12" and 20")
- Straw, excelsior and burlap

Silt Fence

- Full line of silt fences
- Stakes

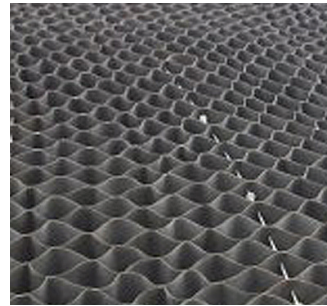

MudPik Trackout

- Remove debris from tires
- Reduces damage to curbs/walks

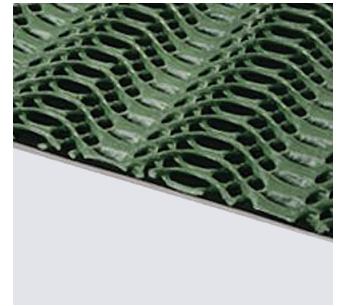

BAM! Ground Mat

- Dual side tread design
- Light weight

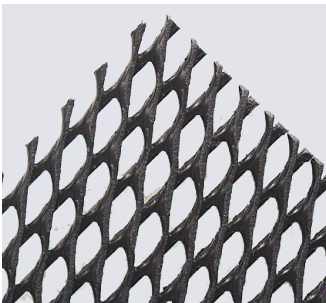

Geocell

- Slope protection
- Erosion and sediment control

Grass Reinforcement

- Grass parking lots
- Pedestrian walkways

Geonet

- High compressive strength
- High laminar flow

Porous Pavers

- Grass or gravel filled
- Trafficked areas

Fabric Pins

- 300, 450 and 600 mm (12", 18" and 24")
- Washer 3 mm (1/8") from end

Staples

- 150 mm (6") 11-gauge steel
- 1,000 per box
