

# Single Wall Internal Tee and Cleated End Plug

A new blow-molded internal tap tee and internal cleated end plug have been developed for those who prefer an internal connection over an external connection. The tap tee and end plug are developed to fit 4" (100 mm) single wall pipe that can be utilized in a variety of projects.

## Typical Applications

- Agricultural drainage systems
- Stormwater conveyance
- Retail market
- Residential drainage
- Turf & irrigation markets

## Features

- Internal installation for secure fit
- Internal connection for uniform outside diameter
- Blow-molded construction
- Designed for compatibility with single wall pipe
- Lightweight design for easy handling & installation
