Inserta Wye™ Roof Drains

Inserta Wye Lateral Connection is ideal for roof drains as it installs faster and is more economical than using fabricated reducing fittings or manholes for roof drain laterals.

Inserta Wye allows for easier mainline pipe grading and reduces cost by reducing labor hours and less pipe materials. New laterals can be connected where needed without disturbing the mainline pipe or backfill.

Applications

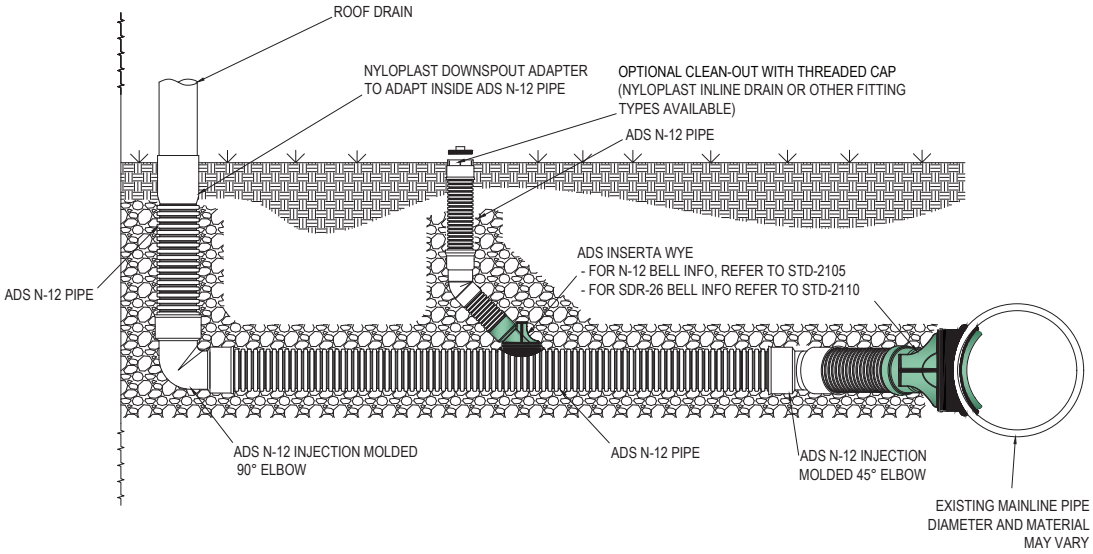

- Warehouse
- Commercial
- Industrial

Features & Benefits

- Three-piece service connection: PVC hub, rubber sleeve, stainless steel band
- Connects 4”-8” (100-200 mm) SDR26/35 PVC or N-12® services
- Connects to all known pipe
- Eliminates glues, epoxies, grout & awkward gaskets
- Matches internal radius to prevent protrusion
- Eliminates need to retighten bands around mainline
- Hole saws are available for all sizes*

*The use of installation methods or hole saws not purchased from Inserta Fittings will void the performance warranty of the product.
