

Dura Slope[®]

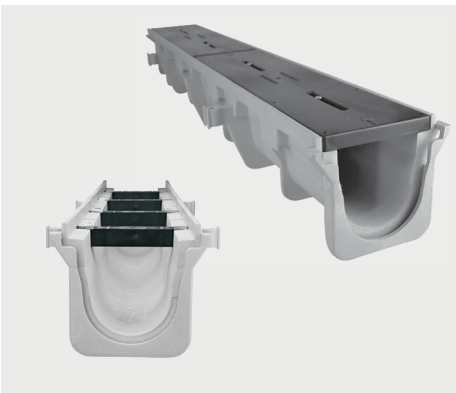

Channel Drain

Dura Slope is an HDPE injection molded channel drain, which is 6" (150 mm) wide by 48" (1200 mm) long. The channel drain is designed for versatility and multiple-use applications. Dura Slope is perfect for vehicular, landscape or sports field applications.

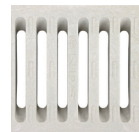

Features and Benefits

Durable HDPE Channel

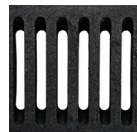

- Impact resistant channel body
- Easy transportation and handling
- No cracks, chips or dings
- 80% lighter than concrete

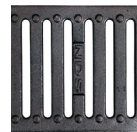

Variety of Grates

Gray Plastic

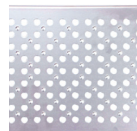

Black Plastic

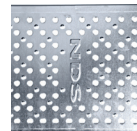

Ductile Iron

Galvanized Steel

Stainless Steel

Galvanized Steel

- Variety of material available
- More design options
- Optimized grate based on application
- Corrosion and UV resistant

Easier to Install

- No accessories required
- Included construction cover
- Built-in rebar attachment
- Faster cuts
- 20% fewer joints vs. ACO

Dura Slope Radius Couplings

Matching Top Grate

Each coupler includes a grate piece that matches color, material and style of the rest of the system.

Snap-Fit Design

Interlocking couplings snap into place and easily make radius transitions to straight channels.

Versatile Configurations

Use one radius coupling or multiple units connected together to fit any application.

Dura Slope Applications

Pools and splash pads

Track and Field

Washdowns
