

Introducing the Expanded Inserta Part Selector

Generates correct Inserta Fittings and hole saw for quick and efficient orders.

Inserta Fittings provide a watertight lateral service connection for stormwater and waste water pipe systems. Inserta Fittings connect to all known pipe types regardless of manufacturer.

Inserta Part Selector

The tool is a one-stop shop for over 78,000 Inserta configurations, including custom items.

Just answer 3 easy questions to generate the needed fitting and hole saw.

1. What is the application?
2. What is the lateral pipe type and size?
3. What is the mainline pipe type and size?

Inserta Part Selector provides:

Output
information

Fittings notes
and details

Hole saw
information

Hole saw
