1-2-3  
easy

Installation is quick and easy. We've organised our parts by step. Grab bag number one to get started.

**STEP 1**

Connect the timer and filter/pressure regulator to your outdoor tap.

**STEP 2**

Connect the supply tubing to the filter/pressure regulator and lay out in the area you want to water. Secure the supply tubing with wire stakes.

**STEP 3**

Punch and attach the pre-assembled feeder lines to the supply tubing and position near plants.

**TIP!**

Additional instructions and videos for programming your timer can be found on [raindrip.com.au](http://raindrip.com.au)

# Ground Cover & Flower Bed Kit

Kit No. RDGCFBK Item No. 08376102001

The ideal solution for watering ground cover and flower beds\* in three easy steps.

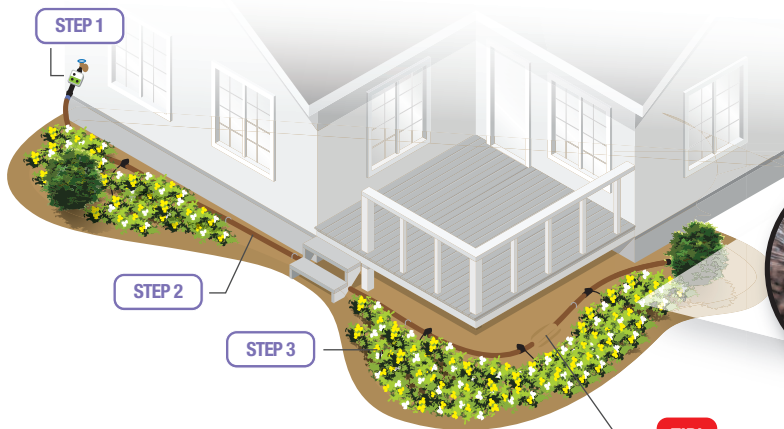

\*Not for lawn use.

Watch an Installation Video

[YouTube.com/user/RaindripInc](https://www.youtube.com/user/RaindripInc)

Raindrip's adjustable sprayer allows for plants to be watered at varying heights. This precision watering system delivers just the right amount of water, saving you up to 50% of the usual amount of water used by conventional sprayers.

**TIP!**  
Use mulch to cover or camouflage the supply tubing.

1-2-3

Outdoor Tap

TOOL-FREE

**1·2·3**  
easy

Installation is quick and easy. We've organised our parts by step. Grab bag number one to get started.

**STEP 1**

Connect the supply tubing to your outdoor tap.

Wire Stakes

1.8 LPH drippers spaced every 0.3m

**STEP 2**

Layout the dripper line in the area you want to water.

**STEP 3**

Secure the dripper line with wire stakes.

Precision dripper line with 0.3m spacing allows for even watering. Just lay this in the rows of your garden and you're set!

End Plug

- NEW! Timed manual modes**
- Easy to program**
- Water tight UV resistant**
- Attaches to any outdoor tap**

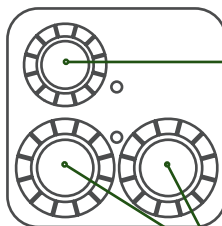

Raindrip's Set-n-Flow Water Timer gives you the ability to water your garden automatically! With varying run and frequency times, there is a setting to suit all your watering needs. You can even pause your watering for up to 72 hours or add an additional watering time of 90 minutes with the turn of a dial. The timer is water tight and UV resistant, easy to program and attaches to any outdoor tap.

### FLOW RATES

|                                                          |             |
|----------------------------------------------------------|-------------|
| 2 bar                                                    | 5.82 l/min  |
| 4 bar                                                    | 10.12 l/min |
| 6 bar                                                    | 13.14 l/min |
| 8 bar                                                    | 15.75 l/min |
| Rated from 0.5 to 8 bar / 7.25 to 116 psi / 50 to 800kPa |             |
