

ADS® Sustainability

Our commitment to advancing sustainable business practices is about more than following eco-friendly trends. It's the core of who we are and what we do.

For more than 50 years, Advanced Drainage Systems has been an industry leader in stormwater management.

Look closer and you will see the ripple effect that sustainable and resilient storm water solutions have on improving the quality of lives in the communities where we live, work and play.

The impact is undeniable.

Our reason is **water.**™

540+ million
Pounds of
plastic recycled
annually by ADS
