**AGRICULTURE**

Our reason is water.™

## Why water management?

I recently stood on the back of a customer's pickup, looking at his corn—something I admittedly do a lot of in this business. He pointed to a small section of his field that he tilled the previous year; until now, he'd never been able to plant there. He smiled and said, **“Sure, planting a few more acres won't make or break my year, but planting more acres in this field for the rest of my life will impact my entire family.”** From that moment on, he's utilized water management systems across his operation on even his best-performing land.

That farmer's simple but powerful statement reaffirmed my staunch belief that water management is the greatest long-term investment farmers can make for their operations. Not only does drainage improve crop yields, but creating the ability to control and move water to the right place at the right time makes our soil systems better for generations to come. Proper drainage improves soil health by increasing ground temperatures, allowing microbes to flourish and earthworms to proliferate—enhancing the plant's root structure. New studies also demonstrate that drainage can reduce nutrient runoff and annual nitrogen loads each year.

As we introduce more automated water management systems, we are taking complete control of the water management process and giving farmers sustainable solutions that will benefit their families far into the future.

There is no better time to be in this business. On behalf of everyone at ADS, we are proud to do our part to keep families farming and your business flowing.

**Darla Bourgeois Huff**  
DIRECTOR OF AGRICULTURE

## Watch our brand video.

Nothing about this industry is sunshine and rainbows, but when the payoff benefits the lives of our customers, it's job satisfaction few will ever know. Watch our video featuring the trials and tribulations of agriculture, and why through every challenge, it's always worth the work.

# The leader in water management solutions, sustainability and safety.

We keep businesses flowing, families farming and job sites safe. ADS Agriculture offers total water management solutions to fit any drainage need in any region of the country. From tile and fittings to lift stations and water control structures, we have the solutions farmers need to improve yields, increase farmable acres and invest in the future of their operations.

Subsurface Irrigation

Agricultural Lift Station

# Safety starts here.

Safety isn't a perk. It's mandatory. In our quest to create safer job sites, we designed the revolutionary new ADS automated trailer. With zero-touch technology, drivers no longer need to interact manually with the product, resulting in fewer injuries and less product damage.

# Leading the way in plastic recycling.

Here at ADS, we're committed to maximizing the use of recycled plastics in many of our agriculture products. Our company strives to help farmers with their bottom line by creating sustainable solutions that exceed multiple pipe performance standards. As a leader in recycling, we will continue to push the limits of what's possible, converting single-use plastics into durable goods that last in your fields for generations to come.

**Sustainability

# All ADS pipe is created equal. Let's dig into the data.

The truth is ADS recycled plastic performs the same as virgin plastic while benefitting the environment. It's a win-win for everyone. Invest in the future of water management, reach for higher yields and lower your environmental impact.

## STILL DOUBTING THE STRENGTH OF RECYCLED PLASTIC?

# Need a reason to believe in the benefits of water management?

## How about 10?

Every dollar invested in drainage improvement creates a bigger payback for you. Lower your water table below the root zone of your crop to avoid saturated soils and increase your yield year over year.

# Let's talk numbers.

---

1

## **HIGHER YIELDS**

Proper subsurface field drainage improves crop yields by 30% on average.

2

## **LOWER BREAK-EVEN PRICE**

Tiled land yields more bushels per acre and lowers the break-even price.

3

## **HIGH RETURN ON INVESTMENT**

Tiling has one of the highest returns on your investment—more than large items like equipment and building improvements.

4

## **HIGHER LAND VALUE**

Tiling adds value to the land, making subsurface drainage an excellent investment.

5

## **LONGER GROWING SEASONS**

Accelerated drying allows for earlier planting in an environment where plants can thrive.

6

## **HEALTHIER ROOTS**

Tiling lowers the water table, so root systems seek deeper moisture and grow better, even in drought years.

7

## **REDUCES EROSION**

Subsurface drainage enables the soil to hold more moisture, reducing runoff and soil erosion.

8

## **REDUCES SOIL COMPACTION**

Tiling reduces standing water and the compaction it causes, so roots can easily penetrate the soil for better overall plant health.

9

## **SUPERIOR SOIL STRUCTURE**

Tiled land creates porous soil with more air and water reaching plants' roots, crucial for healthy growth.

10

## **IMPROVED WEED CONTROL**

Subsurface drainage creates healthier plants that can better resist weeds and diseases.

# Single Wall Pipe

More goes into planning a drainage project than just calculating the slope and square footage. Each region has different weather patterns and soil types. ADS experts ensure each customer gets the best-performing pipe for his or her specific needs. With multiple variations of our single wall pipe, we have what you need for any soil type.

Reduce soil infiltration and create a water management system tailored to you with our single wall pipe.

DESCRIPTIONS
Standard Specifications for 3" to 24" (75 to 600 mm) Corrugated Polyethylene Pipe (PE) and Fittings for Non-Pressure Conveyance of Drainage Water
Elastomeric Seals (Gaskets) for Joining Plastic Pipe Standard Specification
Thermoplastic Pipe Underground Installation for Gravity-Flow Applications
12" to 60" (300 to 1500 mm) Annular Corrugated Profile-Wall Polyethylene Pipe and Fittings for Gravity-Flow Storm Sewer and Subsurface Drainage Applications
Thermoplastic Pipe Underground Installation for Gravity-Flow Applications
Elastomeric Seals (Gaskets) for Joining Plastic Pipe Standard Specification
Joints for Drain and Sewer Plastic Pipes Using Flexible Elastomeric Seals (lab test)
Standard Specification for 2" to 60" (50 to 1500 mm) Annular Corrugated Profile Wall Polyethylene (PE) Pipe and Fittings for Land Drainage Applications
12" to 60" (300 to 1500 mm) Annular Corrugated Profile-Wall Polyethylene Pipe and Fittings for Gravity-Flow Storm Sewer and Subsurface Drainage Applications
Thermoplastic Pipe Underground Installation for Gravity-Flow Applications
Elastomeric Seals (Gaskets) for Joining Plastic Pipe Standard Specification
Material Spec for 12" to 60" (300 to 1500 mm) Dual Wall Polypropylene (PP) Pipe with Variable Pipe Stiffness for Non-Pressure Storm Sewer System Applications
6" to 60" (750 to 1500 mm) Polypropylene (PP) Dual Wall and Triple Wall Pipe and Fittings for Non-Pressure Sanitary Sewer Applications*
Joints for Drain and Sewer Plastic Pipes Using Flexible Elastomeric Seals (lab test)
Standard Guide for Evaluating Nonwoven Fabrics
Standard Test Method for Deterioration of Geotextiles by Exposure to Light, Moisture and Heat
Standard Test Method for Water Permeability of Geotextiles
Standard Test Method for Trapezoid Tearing Strength of Geotextiles
Standard Test Method for Tensile Properties of Geotextiles by the Wide-Width Strip Method
Standard Test Method for Grab Breaking Load and Elongation of Geotextiles
Standard Test Method for Determining Apparent Opening Size of a Geotextile
Standard Test Method for Index Puncture Resistance of Geomembranes
Standard Test Method for Measuring the Nominal Thickness of Geosynthetics
Standard Test Method for Measuring Mass per Unit Area of Geotextiles
Standard Test Method for Static Puncture Strength of Geotextiles
Standard Test Method for Measuring Mass per Unit Area of Erosion Control Blankets
Standard Test Method for Measuring Nominal Thickness of Rolled Erosion Control Products
Standard Test Method for Measuring the Light Penetration of a Turf Reinforcement Mat
Standard Test Method for Determining Tensile Properties of Geogrids
Standard Test Method for Ultimate Tensile Properties of Rolled Erosion Control Products

# Dual Wall Pipe

Dual wall pipe is our most durable agriculture solution. As the inventor of dual wall technology, we carry a long legacy of quality dual wall construction. We have the tools you need to keep business flowing with fewer joints, faster flow rates and increased durability.

SCAN for the digital  
product catalog.

## Dual Wall Pipe

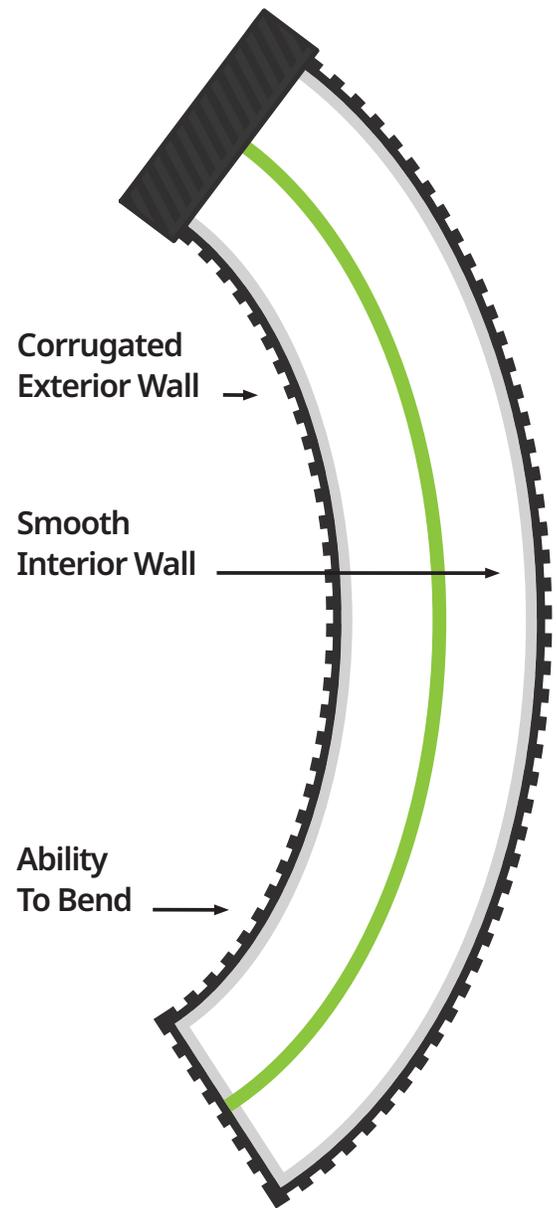

# N-12<sup>®</sup> Flex

The N-12 Flex goes beyond its industry-leading flow rates. It eliminates the need for open trenching, which vastly increases safety and installation speed. Boost your business' bottom line with our most versatile, go-to dual wall pipe and reduce overhead and operation costs while you're at it. The N-12 Flex has the flexibility contractors want and the flow rates that farmers need.

- The industry's best flow rates at 12% faster\* than the flexible dual wall pipe industry average
- Increases flow capacity, enabling more flow from a smaller diameter pipe
- Eliminates the need for open trenching, improving installation, safety and speed
- Reduces the amount of material, labor and equipment needed

# Grain-Aire Pipe

It's crucial for businesses to keep their grain drier for longer. With a 360° airflow, Grain-Aire Pipe Screen is our most cost-effective grain aeration system. The durable screen features a 30% open area to allow unrestricted airflow, and our unique design creates optimal durability. This product allows maximum airflow by preventing grain from entering the pipe and restricting perforations.

## FEATURES

- Resistant to rust and corrosion
- 20' lengths for easy cutting and handling
- Offers more airflow than metal pipe
- Screen available on pipe or in rolls
- Layout and design offered by ADS

## BENEFITS

- Keeps grain drier, longer
- Allows unrestricted airflow
- Prevents grain from entering pipe
- Our most cost-effective grain aeration system

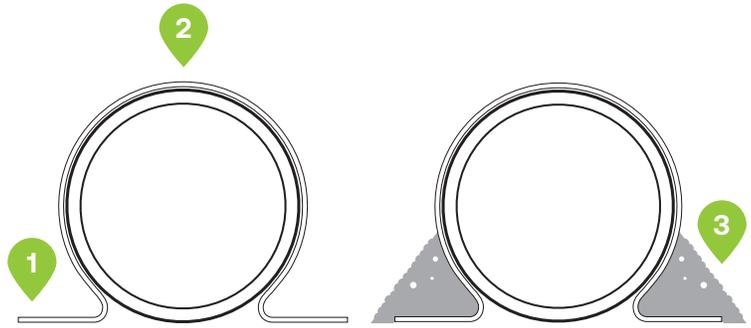

SCAN the code for more information.

**Step 1** | Allow excess of filter fabric to lie flat on ground.

**Step 2** | Center filter fabric over crown of pipe.

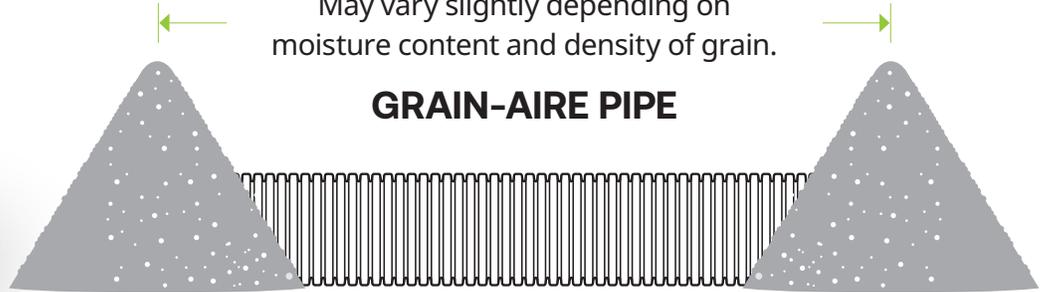

**Step 3** | Shovel grain onto the excess filter fabric to ensure the fabric does not shift.

APPROXIMATELY EVERY 10'

May vary slightly depending on moisture content and density of grain.

# Fittings

We're proud to offer the right fit for any job, no matter the size. Our fittings are built through molded construction and carefully designed to protect against leaks at the joint. And unlike many competitors, we offer fully customizable fabricated fittings. Send a sample to your sales rep, and we'll design it according to your needed specs.

SCAN for the digital product catalog.

## Fittings

# 4" Universal Tap Tee<sup>®</sup>

Our Universal Tap Tee connects 4-inch single wall pipe to 6-, 8-, 10- and 12-inch single and dual wall pipe. That's eight possible connections with just one product. You can install the Universal Tap Tee in seconds, creating a soil-tight connection to your main lines.

### FEATURES

- 3-15/16" hole saw used on all diameters
- Protrusion matches the marketplace and our current product offering
- Advanced rib design prevents the product from rotating
- Stop ring ensures product is not pushed too far into the mainline on 6" and 8" product

### BENEFITS

- Utilizes one fitting for all 6" through 12" single and dual wall products
- Installs in seconds, creating an easy soil-tight connection to main lines
- Reduces SKUs (from 6 to 1) to create efficiency
- Allows easier ordering and inventory process
- Endures wear and tear during pipe installation for rough handling conditions

SIZE	PRODUCT CODE
4" x 6"/8"/10"/12"	0480AA

SCAN the code for more information.

**1** Connection design allows for universal fit of multiple pipe types and wider range of diameters.

**2** Anti-rotation rib prevents over-insertion and maintains proper alignment for a secure fit.

**3** Building on 30 years of ADS cleat innovation, our unique design allows for easy insertion with robust pull-out resistance.

**4** Side wings with pull-out resistant lugs limits rocking and provides stable connection.

**5** Multi-purpose stop rib allows for limited insertion depth on all eight potential connections with one product.

## Fittings

# Inserta Tee<sup>®</sup>

Save time and money with the Inserta Tee, one lateral solution that fits any type of pipe, with the same great performance you trust from ADS products. This easy-to-install connection consists of a PVC hub, rubber sleeve and stainless steel band.

### KEY BENEFITS OF INSERTA TEE

- 5-10x faster installation than traditional fabricated fittings
- Watertight and sturdy, allowing no soil infiltration; requires 100 lbs of pressure to get the fitting out once installed
- Versatile enough to be installed on all products (concrete, clay, plastic, etc.) and sizes; available in 4-30" diameters
- Takes up less space than fabricated fittings and comes in multi-fit options so you can eliminate SKUs

# Water Control Structure

Inline Water Level Control Structures™ effectively manage the water table in your field, wetland or pond by setting stoplogs within the structure to your desired water-level height. Management allows for controlled release of outlet flow, the retention of valuable nutrients and effective flood mitigation.

## FEATURES

- Constructed of rugged 1/2" PVC with a lockable plastic lid
- Stainless steel screws and custom anodized aluminum corner extrusions used for strength and durability
- Rugged injection molded stoplogs in 5" and 7" heights for adjustability (included in structures with 4" – 12" pipe sizes)
- PVC stoplogs with metal hooks in 5" and 7" heights for adjustability (included in structures with 15" – 24" pipe sizes)
  - Stoplogs must remain in track during structure installation
  - Structures are intended for gravity flow; some seepage may occur

## BENEFITS

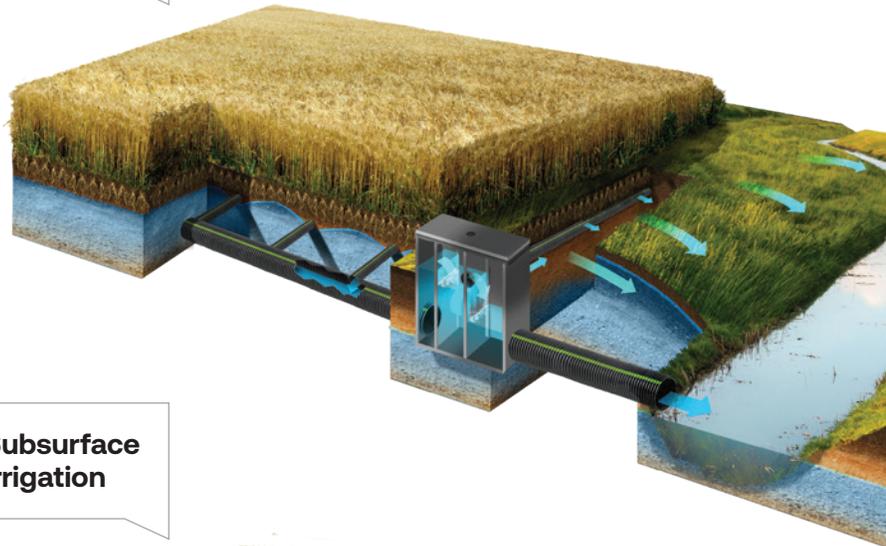

- Increases yields by controlling root zone water availability
- Enables management of changing climate conditions
- Increases profitability of land with limited productivity
- Applicable within various nutrient-reduction systems (saturated buffers, drainage water management, sub-irrigation, bioreactors, etc.)

SCAN the code for more information.

**Saturated Buffer Strip**

**Subsurface Irrigation**

**Bioreactors**

# Surface Inlets

Every facet of water management is vital to keep your business flowing. And when you need to remove water faster, surface inlets are the go-to option for reducing water pooling in fields. These water management systems are commonly used in terrace tiling and pattern tiling systems.

# HP Agricultural Lift Station

Created with farmers and landowners top of mind, lift stations come equipped with user-friendly technology to create one system that manages water flow rates, field water-table levels and power consumption. And with a Remote Monitoring System, your lift station can be accessed via any web-enabled device so that you can control your water management system from anywhere.

## FEATURES

- 1800 rpm means longer bearing motor lifetime and less vibration
- Unique impeller design created, optimal gallon-per-minute-per-watt performance
- Electronic panel is completely enclosed and is protected from the environmental elements
- Remote Monitoring System is satellite-based
- Electrical schematic stickers on enclosure door show electrical connections and instructions

## BENEFITS

- Increases yield by controlling root zone water availability
- One system that manages water flow rates, field water-table levels and power consumption
- Reduces on and off cycles
- Cloud-based data storage allows for historical comparisons
- Factory-trained support available 24/7 from pump manufacturer

**SCAN** the code for more information.

# Geotextiles

Geotextiles prevent and control erosion in high erosion-prone areas. They serve as an underlayer to reinforce ditches from erosion or settling.

And, they keep the division between aggregate and soil so your investment lasts longer.

Geotextiles are a true multi-use product.

SCAN for the digital product catalog.

### LIGHT WEIGHT · NONWOVEN

WEIGHT	W X L	SY/ROLL	PRODUCT CODE
3 oz. (85 g)	12.5' x 360' (3.8 x 109.7 m)	500 (418 m <sup>2</sup> )	0311TG
3 oz. (85 g)	15' x 360' (4.6 x 109.7 m)	600 (502 m <sup>2</sup> )	0311TS
3.5 oz. (99 g)	2' x 360' (600 x 109.7 m)	80 (67 m <sup>2</sup> )	0351TC
3.5 oz. (99 g)	3' x 360' (900 x 109.7 m)	120 (100 m <sup>2</sup> )	0351TA
