## $\mathrm{N}-1{ }^{\circledR}$ PLAIN END PIPE (PER AASHTO) SPECIFICATION

## Scope

This specification describes 4 - through 60-inch (100 to 1500 mm ) N-12 plain end pipe (per AASHTO) for use in gravity-flow land drainage applications.

## Pipe Requirements

$\mathrm{N}-12$ plain end pipe (per AASHTO) shall have a smooth interior and annular exterior corrugations.

- 4 - through 10 -inch ( 100 to 250 mm ) pipe shall meet AASHTO M252, Type S or SP.
- 12- through 60 -inch ( 300 to 1500 mm ) pipe shall meet AASHTO M294, Type S or SP, or ASTM F2306.
- Manning's "n" value for use in design shall be 0.012.

## Joint Performance

Pipe shall be joined with coupling bands covering at least two full corrugations on each end of the pipe. Standard connections shall meet or exceed the soil-tight requirements of AASHTO M252, AASHTO M294, or ASTM F2306.

Gasketed connections shall incorporate a closed-cell synthetic expanded rubber gasket meeting the requirements of ASTM D1056 Grade 2A2. Gaskets, when applicable, shall be installed by the pipe manufacturer.

## Fittings

Fittings shall conform to AASHTO M252, AASHTO M294, or ASTM F2306.

## Material Properties

Material for pipe and fitting production shall be high density polyethylene conforming with the minimum requirements of cell classification 424420 C for 4 - through 10 -inch ( 100 to 250 mm ) diameters, and 435400 C for 12 - through 60 -inch ( 300 to 1500 mm ) diameters, as defined and described in the latest version of ASTM D3350, except that carbon black content should not exceed 4\%. The 12- through 60inch $(300$ to 1500 mm$)$ pipe material shall comply with the notched constant ligament-stress (NCLS) test as specified in Sections 9.5 and 5.1 of AASHTO M294 and ASTM F2306 respectively.

## Installation

Installation shall be in accordance with ASTM D2321 and ADS recommended installation guidelines, with the exception that minimum cover in trafficked areas for 4- through 48-inch (100 to 1200 mm ) diameters shall be one foot. ( 0.3 m ) and for $60-\mathrm{inch}(1500 \mathrm{~mm})$ diameter the minimum cover shall be 2 ft . $(0.6 \mathrm{~m})$ in single run applications. Backfill for minimum cover situations shall consist of Class 1 (compacted), Class 2 (minimum $90 \%$ SPD) or Class 3 (minimum 95\%) material. Maximum fill heights depend on embedment material and compaction level; please refer to Technical Note 2.01. Contact your local ADS representative or visit our website at www.adspipe.com for a copy of the latest installation guidelines.

## Build America, Buy America (BABA)

N-12 Plain End pipe (per AASHTO), manufactured in accordance with AASHTO M252, AASHTO M294 or ASTM F2306, complies with the requirements in the Build America, Buy America (BABA) Act.
