## Technical Note

## TN 1.01HP HP Storm Perforation Patterns

## Overview

Perforated pipe plays an integral role in many applications of dual wall (Type S) HP Storm polypropylene (PP) pipe. Generally, perforated pipe is used to accelerate the removal of subsurface water in soils or to allow storm water to percolate into the soil. Currently, two classifications of perforations are specified in the AASHTO material specifications for PP pipe: Class I, and Class II. The Class II perforation pattern comes standard when perforated pipe is ordered. Class One perforated pipe has limited availability. Please check with a local representative to determine availability. Both classes are explained in more detail in the AASHTO materials specifications (M330).

## Standard Perforation Patterns

## AASHTO Class // Perforation

The following terminology for perforations is derived from the applicable AASHTO specification. Differences between the specifications are covered in the table below. Class II perforations shall be located in the outside valleys of the corrugations, be circular and/or slotted and evenly spaced around the circumference and length of the pipe. The perforations shall be located in the outside valleys of the corrugations. The water inlet area shall be no less than $1.5 \mathrm{in}^{2} / \mathrm{ft}$ $\left(30 \mathrm{~cm}^{2} / \mathrm{m}\right)$ for pipe diameters 12 - through 18 -inch ( $300-450 \mathrm{~mm}$ ) and $2.0 \mathrm{in}^{2} / \mathrm{ft}\left(40 \mathrm{~cm}^{2} / \mathrm{m}\right)$ for pipe diameters larger than and equal to 24 inches ( 600 mm ). Table 1 below represents ADS standard perforation patterns for AASHTO Class II.

| Nominal I.D. | Perforation Type | Maximum Slot Length or Diameter | Minimum Inlet Area |
| :---: | :---: | :---: | :---: |
| 12" (300 mm) | Circular | $0.313^{\prime \prime}$ ( 8 mm) | $1.5 \mathrm{in}^{2} / \mathrm{ft}\left(32 \mathrm{~cm}^{2} / \mathrm{m}\right)$ |
| 15" ( 375 mm ) | Circular | $0.313^{\prime \prime}$ ( 8 mm ) | $1.5 \mathrm{in}^{2} / \mathrm{ft}\left(32 \mathrm{~cm}^{2} / \mathrm{m}\right)$ |
| 18" ( 450 mm ) | Circular | $0.313^{\prime \prime}$ ( 8 mm ) | $1.5 \mathrm{in}^{2} / \mathrm{ft}\left(32 \mathrm{~cm}^{2} / \mathrm{m}\right)$ |
| $24^{\prime \prime}(600 \mathrm{~mm})$ | Circular | $0.313^{\prime \prime}$ ( 8 mm ) | $2.0 \mathrm{in}^{2} / \mathrm{ft}\left(42 \mathrm{~cm}^{2} / \mathrm{m}\right)$ |
| 30" (750 mm) | Circular | $0.375^{\prime \prime}$ ( 9.5 mm ) | $2.0 \mathrm{in}^{2} / \mathrm{ft}\left(42 \mathrm{~cm}^{2} / \mathrm{m}\right)$ |
| $36^{\prime \prime}(900 \mathrm{~mm})$ | Circular | 0.375 " ( 9.5 mm ) | $2.0 \mathrm{in}^{2} / \mathrm{ft}\left(42 \mathrm{~cm}^{2} / \mathrm{m}\right)$ |
| 42" (1050 mm) | Circular | 0.375 " ( 9.5 mm ) | $2.0 \mathrm{in}^{2} / \mathrm{ft}\left(42 \mathrm{~cm}^{2} / \mathrm{m}\right)$ |
| 48" (1200 mm) | Circular | $0.375^{\prime \prime}(9.5 \mathrm{~mm})$ | $2.0 \mathrm{in}^{2} / \mathrm{ft}\left(42 \mathrm{~cm}^{2} / \mathrm{m}\right)$ |
| $54^{\prime \prime}(1350 \mathrm{~mm})$ | Circular | 0.375 " (9.5 mm) | $2.0 \mathrm{in}^{2} / \mathrm{ft}\left(42 \mathrm{~cm}^{2} / \mathrm{m}\right)$ |
| 60" ( 1500 mm ) | Circular | 0.375 " ( 9.5 mm ) | $2.0 \mathrm{in}^{2} / \mathrm{ft}\left(42 \mathrm{~cm}^{2} / \mathrm{m}\right)$ |
