

Nyloplast® Fittings

Nyloplast offers various types of fittings designed for underground piping systems currently available to the North American market. Nyloplast fittings can connect and adapt to corrugated polyethylene, PVC SDR-35, SDR-26, IPS Schedule 40, Schedule 80, C-900, C-905, ribbed PVC, corrugated PVC, and many other pipe types. This provides a great fitting for dissimilar pipe connections for numerous applications.

Fittings are available 4" (100 mm) - 36" (900 mm) and include, but are not limited to: couplers, cleanouts, downspout adapters, elbows, end caps, tees, wyes, tee-wyes, increasers, sanded manhole adapters, SCH-40 adapters, and SWR adapters.

Features

Service life

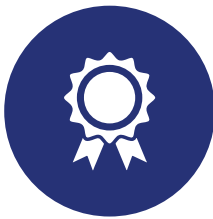

Rigid PVC durability

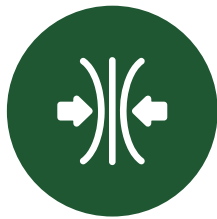

Meets ASTM D3212 standards

Sanitary grade watertight joint performance for storm and sewer applications

Nyloplast SDR35 PVC fittings meet ASTM F1336, ASTM D3034 and ASTM F679

Flexible elastomeric seals conform to ASTM F477

All Nyloplast inventory conforms to ASTM D1784 cell class 12454
