## HP Storm Benefits

HP Storm pipe is the perfect choice for gravity-flow storm drainage applications when premium joint performance and/or greater pipe stiffness is required.

Reduction of Joints

Sanitary Sewer Grade Joints

Lower Lead Times

FDOT Approved for 100-Year Service Life

Light Weight: 1/20 the weight of Class III RCP

Lowest Installed Cost

## Raise the Grade on Storm Pipe

### Speed

Factory installed dual water tight gaskets with Anti-Roll Technology along with 60% less pipe connections over outdated traditional pipe technology provide unmatched installation production.

### Safety

Polypropylene's lightweight material design provides the Safest possible conditions for your crew members in the trench. Nothing is more important than keeping your crew members safe.

### Performance

Class II Polypropylene is the industry's Highest Performing stormwater drainage pipe material. Designed and manufactured to meet Sanitary Sewer standards providing High Pipe Stiffness and Air Testable pipe joints. 20ft Standard pipe lengths greatly increases the performance of your stormwater pipeline by reducing the number of connection points by 60%.

**Greater production efficiencies, lower material cost, and less repair.  
Class II PP keeps you ahead of schedule and under budget.**

## Open up competition, drive down cost

When multiple materials are specified, you are ensured that:

Performance based standards are met.

Open competition is present, driving down overall installed cost.

Research suggests that municipalities which bid two or more technically qualified materials save up to 50% in total installed costs versus municipalities that specify and bid only one material.
