

Aquabox

A high capacity modular underground system designed for the sustainable management of stormwater.

The modules are assembled on site and can be used in detention, infiltration & harvesting applications.

Applications:

- Parking lots
- Private/Commerical
- Public
- Green infrastructure

High Void Ratio

Aquabox provides 96% void ratio

O&M

Easy access for inspection, routine maintenance

Modular

Ships a high volume of modules in fewer full truckloads

Efficient

16,000+ ft³ (453 m³) installed volume ships via 1 truck

Versatile

Highly scalable to fit any project
