

Infiltrator Guardian™

24-inch Safety Device

The Infiltrator Guardian™ takes septic system safety to the next level. It protects against unauthorized entry of septic tanks while also improving waste haulers' speed and ease when servicing tanks. The Infiltrator Guardian™ is built to accommodate a variety of risers including Infiltrator's EZsnap and EZset risers, as well as 24-inch diameter pipes risers. It mounts to the top of the riser, which enables it to be used at the start of a new system or years after. Join the effort to make safety the industry's top priority by using the Infiltrator Guardian™ on your next job and reset the standard for septic system safety.

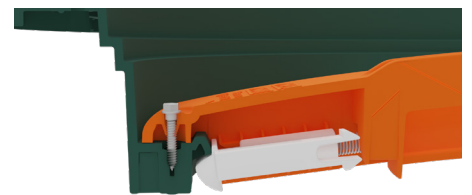

Benefits

- **UNIVERSAL FIT:** Compatible with Infiltrator EZsnap & EZset (24-inch diameter) riser systems and lids. The Infiltrator Guardian™ is also compatible with 24-inch diameter corrugated dual-wall and ultra-rib pipe
- **INCREASED ACCESS:** The safety gate design allows waste haulers to easily navigate a vacuum hose throughout the septic tank's riser
- **STRENGTH:** Capable of supporting over 300 pounds
- **EASE OF USE:** A single stainless-steel retained screw locks the safety gate in place
- **SECONDARY SAFETY:** The safety latch protects against incidental and unauthorized entry

Child-Safe Design

Integrated spring-loaded latch automatically engages every time the gate is closed, requiring 50 pounds of force to open it.

Easy Access

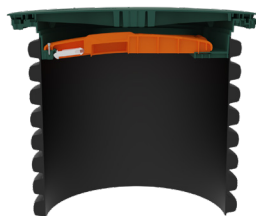

The gate design allows waste haulers quick access to the tank below with 22.5 inches of space to navigate their hose.

Universal Compatibility

EZsnap Riser

Corrugated
Dual Wall Pipe

Ultra Rib Pipe

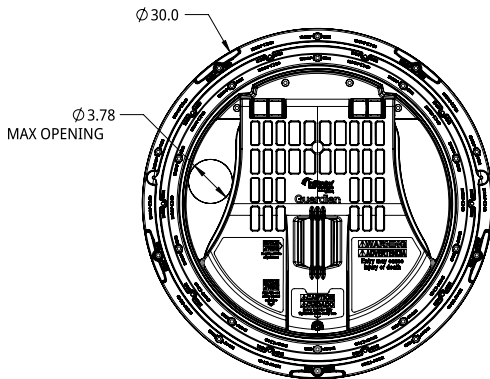

EZset Riser
