

Nyloplast® Sump Insert

Nyloplast Sump Insert accessory allows our drain basins to be manufactured without a sump. This new component is the first of its kind in the industry and is designed to direct inlet water to the lowest outlet by filling in the area where the sump would normally be present.

The Sump Insert eliminates the concern of sitting water in the drain basin, thus eliminating concerns of bacterial growth and pests such as mosquitoes. This product can only be installed during production of 12" - 30" (300-750 mm) diameter drain basins. The shell of the Sump Insert is made from polyethylene, which is corrosion and abrasion resistant, and is completely sealed.

Nyloplast Sump Insert

Part Number	Basin Diameter
3812AGSI	12" (300 mm)
3815AGSI	15" (375 mm)
3818AGSI	18" (450 mm)
3824AGSI	24" (600 mm)
3830AGSI	30" (750 mm)
