Declaration of Conformity regarding Per- and Polyfluorinated Alkyl Substances

Per- and polyfluoroalkyl substances (PFAS) are a diverse group of persistent chemicals widely used in consumer products to enhance oil and water repellency or withstand extreme temperatures. Thousands of different PFAS exist, and their persistent nature leads to their accumulation in both humans and the environment.

Advanced Drainage System does not manufacture, sell, handle, distribute, store, or dispose of any product(s) which contain Per- or Polyfluoroalkyl Substances (PFAS) including, but not limited to Perfluorooctanoic acid (PFOA) or Perfluorooctanesulfonic acid (PFOS).

Advanced Drainage System has reviewed the recently issued EPA National Primary Drinking Water Regulation (NPDWR), docket EPA-HQ-OW-2022-0114, and confirm along with Plastic Pipe Institute that the six PFAS chemicals identified are not intentionally added to polypropylene or polyethylene plastic piping materials used in water distribution.

Please contact us if you have any further questions about our program.
